FaxEnable Secure Fax Solution

- **PCI & HIPAA compliant** faxing via the secure HTTPS interface – *the same technology your bank uses*
- **99.93% reliability, even on large faxes.** Unlike T-38 & Fax over IP (FoIP) solutions, FaxEnable uses reliable, proven PSTN
- **80% less than the leading “e”-fax service** – only \$2.99 per month and 3 cents per minute of faxing (5-6 pages/min)
- **“Green” flexibility and accessibility** – No need to scan in your printed faxes; they are already PDF documents! Desktop PC faxing, fax-to-email, web access *included!*
- **Keep using your fax machine**

FaxEnable is a revolutionary new product that allows you to **keep using your existing fax machine**, to send faxes the same way you always have... at a fraction of the cost of a separate fax line. You will need to send more than **12,000 pages a month** to equal your current line costs!

Every time you fax, you will save valuable time by converting your single-line fax machine into a **multi-line fax factory**. No more waiting to send or receive faxes.

Incoming faxes are **automatically converted to PDF format**, then either emailed directly to you and your team, or kept in a **secure HTTPS web site**, for pickup anytime, and from anywhere.

Unlike traditional “e”-fax services, **FaxEnable** uses the tried and true **copper telephone lines that ensure reliable fax delivery**. Since we don’t have to run those lines all the way to your office, you save significantly every month, when compared to what you pay the telephone company for the same service.

Also, because those copper telephone lines are centralized at our location instead of yours, you have access to use all of those lines when needed, which **vastly expands your fax capacity**.

Stop losing money. **FaxEnable** your business **today!**

KEEP YOUR FAX NUMBER

Local Number Porting is available nationwide, so you can keep your existing fax number.

INCREASE CAPACITY

In busy offices, the fax machine can be a bottleneck. FaxEnable turns your single-line fax into a multi-line fax factory. No more waiting to send/receive!

FAX ANYWHERE

Send and receive faxes when you are in the office, at the beach or around the world.

EASY TO USE

Since you can keep using your existing fax machine, there isn’t a frustrating learning curve.

NOT T-38 or FoIP

Most other “e”-fax providers use unreliable T-38 or Fax over IP (FoIP). We use the same reliable TDM technology that is running to your fax machine now, but for far less money each month!

Frequently Asked Questions (FAQs)

SETUP INCLUDED

We work with you to port your existing fax number, then send you a pre-configured FaxEnable device. Plug in internet, power, then you fax. EASY as 1-2-3!

BEST COMPATIBILITY

FaxEnable works with any standard fax machine, and you can even fax using a PC or Mac. All versions of Outlook and Mac Mail can use fax-to-email PDF. Most mobile platforms can view FaxEnable faxes as well.

"GREEN" FRIENDLY

Many offices still waste paper to print incoming faxes, only to scan them back into the computer. FaxEnable removes the hassle!

ReliAvail.com

Q: How much does the FaxEnable device cost?

A: The FaxEnable device costs \$199 (one-time fee, shipping incl'd). Your credit card will also be charged \$35 to purchase initial fax time, then \$20 every time your balance reaches \$5. Each fax number is \$2.99 per month. Faxing is \$0.03 / minute (about 5-6 pages per minute), with 6-second billing increments.

Q: Isn't \$199 expensive for a FaxEnable device?

A: When you consider that the typical FaxEnable user sends over 12,000 fax pages in any month before they break even with their current fax line cost, we think FaxEnable is a bargain!

Q: Do I need to be a computer whiz to use FaxEnable?

A: Nope! We will ship everything to you preconfigured. You simply plug the device into your DSL, fiber or cable internet and start faxing.

Q: Can I keep my existing fax number and still use FaxEnable?

A: Yes, absolutely. We can port your existing U.S. fax number. In rare cases (ie: rural carriers), your fax number may not be portable.

Q: Does FaxEnable work outside the U.S.?

A: FaxEnable is only supported in the continental U.S. / US48.

Q: How is FaxEnable so much cheaper than the phone co.?

A: We leverage your existing internet connection to securely transmit faxes, eliminating costly copper telephone lines. We also take you directly to the wholesale services provider.

Q: Is FaxEnable really PCI and HIPAA compliant?

A: So long as you do not use the Fax-to-Email feature of FaxEnable, yes, the service is PCI and HIPAA compliant.

Q: Does FaxEnable require a contract commitment or charge early termination fees?

A: No, absolutely not. If you do not like the service, you pay only for what you have used. Cancel at any time.

Q: Is this a pre-paid service? How may I pay?

A: Yes, FaxEnable is a pre-paid service. Visa, MasterCard, Discover and American Express are accepted.
