## VoIPEnable For Legacy Phone Systems

### KEEP YOUR NUMBER

Local Number Porting is available for 97% of the U.S., Canada and Caribbean, so you can keep your existing numbers.

### INCREASE CAPACITY

In busy offices, analog phone lines or PRIs are bottlenecks. VoIPEnable converts limited-line legacy PBX into on-demand call factories. No more waiting for additional phone line capacity!

### TRANSACTION ANYWHERE

Over 11,500 rate centers in the U.S., Canada and Caribbean are available and over 500,000 local / toll free numbers are in stock. We offer local numbers in 60 countries worldwide.

### FEATUREFUL

All numbers (DIDs) come with free voicemail, call notifications, PBX failover, voicemail transcription, and SMS text messaging; CNAM/LIDB, inbound CNAM, e911, Directory Listing available at nominal rates.

**VoIPEnable** is an exciting new offering that allows you to **leverage your existing phone system investment**, while taking advantage of cost-saving, flexible and robust **SIP trunking technology**. Now you can trade expensive, limited, and contracted PRI and analog dial tone for reliable and affordable SIP telephone service.

Since we take you direct to the telephone services wholesalers, you no longer have to worry about expensive or drawn-out capacity upgrades, done at the leisure of the telephone company. Typical capacity upgrades, additions, moves and changes can be **completed within minutes** instead of days or weeks. Need local numbers in the U.K., Hong Kong and Sweden today? We can do it!

- **Maintain your phone system investment** while taking advantage of the cost-savings, versatility and added capacity of SIP
- **Keep your phone numbers** by porting them to the **VoIPEnable** platform – 97% coverage of U.S., Canada and Caribbean
- **Establish global offices in a snap** with access to over 11,500 rate centers and international numbers in over 60 countries
- **Gain valuable business intelligence** and respond effectively when you track your marketing efforts via unique (commodity) telephone numbers
- **Leverage real-time call detail reporting**

We work extensively with Vitelity Communications, a proven leader in SIP trunking, with over 10 years of VoIP service experience. In fact, Vitelity has the **largest footprint of any VoIP provider!**

Maybe you want to gain **real-time call reporting** intelligence, **connect remote offices worldwide**, or realize the cost-savings of **free in-network calling**. **Perhaps you want to eliminate per-seat licensing**. No matter the challenge, we can help you design the VoIP solution that will work for your business, and maintain your investment.

Stop losing money. **VoIPEnable** your business **today!**

## Frequently Asked Questions (FAQs)

satisfied customers

### SETUP INCLUDED

We work with you to port your existing numbers, then send you a pre-configured VoIPEnable device or come to your site for full integration and testing.

### MAX COMPATIBILITY

VoIPEnable works with virtually any PBX and virtually any type of phone port (PRI, FXS, FXO).

### BUDGET FRIENDLY

Pay only for the capacity you need, when you need it. Now your telephone service costs will correlate to revenue generation!

### NO CONTRACTS

Month-to-month services, no commitment required.

[ReliAvail.com](http://ReliAvail.com)

**Q: How much does the VoIPEnable device cost?**

**A:** Pricing varies based on the interface number and type (PRI, FXS, FXO) required. Package pricing starts at \$795 for 4FXO + 4FXS.

**Q: Isn't \$795+ expensive for a VoIPEnable device?**

**A:** When you consider that the typical VoIPEnable per-minute rate is a fraction of what the major phone companies charge, VoIPEnable is a bargain! Most solutions pay off in less than 12 months.

**Q: Do I need to be a computer / PBX whiz to use VoIPEnable?**

**A:** Nope! We will ship everything to you preconfigured and even offer on-site interfacing and testing with your phone system.

**Q: Will I lose calling features when I use VoIPEnable?**

**A:** You'll *gain* features that weren't available or affordable before!

**Q: Are there other benefits to using VoIPEnable?**

**A:** In many cases, we are able to integrate redundant internet connectivity into your business, for less than you pay for phone now.

**Q: Can I keep my existing phone numbers and use VoIPEnable?**

**A:** Yes, absolutely. We can port most all existing phone numbers. In some rare cases (ie: rural areas), numbers may not be portable.

**Q: Does VoIPEnable work outside the U.S.?**

**A:** It works from any location with quality, low latency bandwidth.

**Q: How is VoIPEnable so much cheaper than the phone co.?**

**A:** We take you to the wholesale telephone providers directly, and leverage commodity internet connection(s) to transmit phone calls, eliminating costly copper telephone lines and PRIs.

**Q: Does VoIPEnable require a contract commitment or charge early termination fees?**

**A:** No, absolutely not. If you do not like the service, you pay only for what you have used. Cancel at any time.

**Q: Is this a pre-paid service? How may I pay?**

**A:** Yes, VoIPEnable is a pre-paid service. Visa, MasterCard, Discover and American Express are accepted.
